

LPS Client Supported Operating Systems

Description

What specific Operating Systems are supported for the Software Print Server (LPS) Client programs?

Article Number

2016007

Solution

The LPS Client programs include the following:

- On Demand Print Client
- Software Print Server Status Client
- Active X

Versions

All supported LPS versions

Environment

All supported environments

Note:
All Software products, controls, clients, and connectors run as 32-bit applications on 64-bit Windows operating systems.

Please see the Client Requirements section of the *Software Print Server and Label Manager Installation Guide* for the supported operating systems for your version of LPS.
